## PRODUCT PROFILE UK PORK

1 0 0 1 food mls

East Anglia has always been synonymous with pig farming. Miles Rudham from **Cherryfield Ltd** is one of our key suppliers of quality fresh pork as well as Andrew Haag, whose farm is located near Walberswick in **Norfolk**.

The farm is home to some 600 outdoor sows which are housed in single farrowing pens that provide a safer environment for their young piglets to develop.

After 23 days the piglets are placed in outside wiener kennels. These provide protection from the elements and wildlife such as badgers and foxes that can distress the animals. The young piglets are fed a diet of cereal and powdered milk. Once the piglets are at 22 weeks they are ready for the market.

The pork farms and abattoir are all within a 60 miles radius, reducing any stress to the animals and limiting carbon emissions.

Legs and loins are traditionally the choice of chefs to roast, but recent times have seen trends towards alternative cuts such as shoulders and bellies. At BPM we can supply all of these products, on or off of the bone, along with chops steaks and escallops (all of which can be prepared to your specification).
